

**Nouvatan** has been developed using totally organic active ingredients. So you can achieve a fantastic golden tan without subjecting your skin to harmful UV rays.

Nouvatan contains no alcohol or parabens so you can be assured that what you are putting on your skin is totally safe and dermatologically tested and manufactured to ISO 9001-2000 quality standard.

NOT TESTED ON ANIMALS

## *How it works*

The primary active ingredients is a sugar derivative called DHA which when is sprayed on the top layers of your skin reacts with the amino acids thus creating a colour change similar to a UV sun tan. As your skins sheds, the tan fades naturally between 5-7 days after application.

Your therapist will apply a guide colour to your body, which ensures a perfect application. This guide colour is very natural looking which allows you to go about your day without looking like you've been in a mud bath! this then washes off after development to leave you beautifully tanned.

## *Before your tanning session*

Shower & Exfoliate your body

Avoid heavy moisturising shower gels

Do Not Apply moisturisers, deodorants oil based products or perfume

Wax/shave at least 24 hours before

Wear loose dark clothing and open shoes eg. flip flops

Avoid silk, wool & leather garments as tan will not wash out of these materials

## *The Session*

Wear suitable swimwear or underwear to create desired result

If using underwear ensure its black as tan does not wash out of elastic/lace

Your therapist will apply barrier cream to your hands & feet and other dry areas

Your session will last around 15 mins

You will be dry to dress straight after

Do not touch skin whilst developing to avoid tanned fingers (not a good look!)

## *After Care*

Shower between 6-8 hours after treatment

Pat dry with towel. Do not rub

Avoid water on skin whilst tan is developing. Especially rain!!!

Avoid heavy exercise or any perspiration during development

Moisturise body regularly to maximise duration of tan

**Ensure all tan is exfoliated off before next session.**
